Safety Attentions

- This machine is designed for home use only. It is not suitable for commercial or industrial conditions, nor should it be used outdoors or in wet places;
- Never allow children or individuals with limited physical or mental abilities to use this product alone;
- Please use it safely and under the supervision of someone who understands how to use the product properly and is aware of the potential dangers;
- Be cautious when using near children or pets, and do not let them play with the product;
- Do not touch the plug or machine with wet hands, and do not vacuum up wet hair or liquid;
- If the power cord or plug is damaged, do not use the product;
- If the product is not functioning correctly, broken, left outside for an extended period, or has been exposed to liquids, contact our company immediately;
- Do not disassemble the product. Improper assembly may result in electric shock or fire, Contact our company for repairs;
- Do not vacuum flammable or combustible liquids, such as gasoline, and avoid using the product in areas with flammable or combustible gases;
- Do not pull on the power cord, place heavy objects on top of the machine, or let the door trap the cord. Also, do not vacuum cigarettes, matches, hot soot, or other burning, smoking, or hot items;
- Do not insert anything into the air inlet or block it. After use, maintenance, or replacement of parts, ensure that the plug is disconnected before handling the machine;
- Do not store the product outdoors, in the bathroom, or other damp locations;
- Avoid using aromatic or scented substances as filters, as they may cause fire;
- If the power cord is damaged, have it replaced by a professional from the manufacturer's maintenance department or a relevant service provider to avoid any risks.

Safety Attentions

- **Please do not operate or pull out the plug with wet hands**

This can cause failure and electric shock, which must be strictly prohibited.

- **Do not vacuum flammable or highly flammable substances such as cigarettes, and avoid using the product in areas with flammable liquids, as it can lead to fire or explosion.**

- **There may be an initial smell during the first time use**

But it is not harmful to the body and will disappear after a while. However, if there is a persistent burning smell, stop using the product immediately.

- **To prevent failure and accidents, please clean the dust cup and sponge filter regularly**

Make sure to turn off and unplug the machine before doing any maintenance.

- **Do not attempt to maintain the product while it is turned on**

As this can result in accidents or dangers. If the temperature of the product rises abnormally during use, stop operation immediately and let it cool down before continuing.

- **If the motor overheats or the air inlet is blocked, stop operation immediately**

remove the dust cup, and clean the sponge filter. Allow the product to cool down for at least 30 minutes before turning it back on.

- **Make sure all filters are properly installed before using the product**

As failure to do so can cause malfunctions.

- **Pay attention to sharp blades and right angles when using accessories**

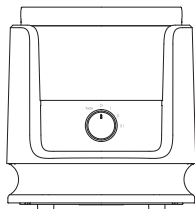

such as Grooming brush and trimmers, as they can cause cuts or injuries.

***Note:**

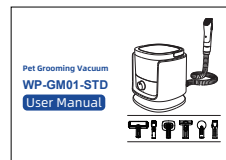

- Please note that the hose has a conductive function and should not be used to suck up or immerse in water for cleaning purposes;
- Regularly check the hose for damage, and do not use it if it is damaged;
- Before cleaning or performing maintenance on the product, be sure to remove the plug from the socket to prevent accidents.

Using instructions

Use of Accessories

Grooming Brush

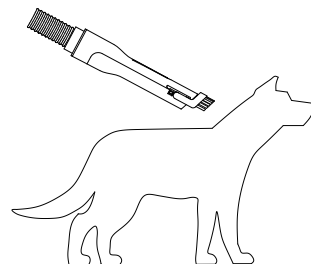

It can clean the floating hair on pets and the garbage in the hair, and at the same time it has the function of lengthening the hair, making the hair more fluffy.

Deshedding Brush

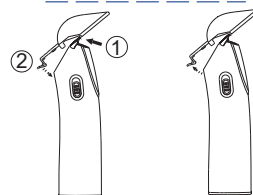

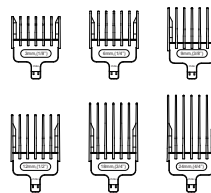

Quickly and easily remove loose hair for long and short haired dogs and cats.

Note: During use, please pay attention to the cutting edge and sharp position, do not use excessive force to cause the skin scratches.

2 in 1 flat brush

Clean your pet's body and shed hair to achieve a clean effect.

Install Take apart

Clipping Comb

According to different hair style needs to choose (optional use).

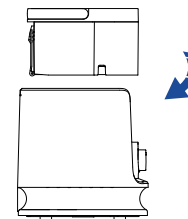

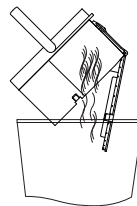

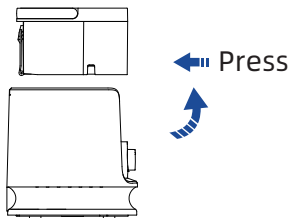

Note: The objects are scattered and small, please keep them properly when not in use.

***Note:** When using the product, avoid aiming the suction head directly at your pet's face.

Daily maintenance

Clean the dust cup

1. Remove the dust cup
Remove the dust cup by lifting it slightly in the direction of the arrow.
2. Open the cover and pour out
Push the clasp to open the dust cup and pour out the dander.
3. Place the dust cup
Install the dust cup in the direction of the arrow.

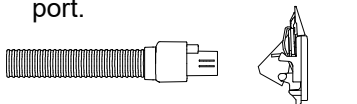

***Note:** When removing the dust cup, handle it with care and do so gently. After emptying the dust cup, allow it to fully dry before reinstalling to prevent any water from entering the motor and causing electric shock or damage to the machine.

Trimmer Cleaning

1. Remove the knife tip.
2. Remove debris from the suction port.
3. Add lubricant to cutter head.

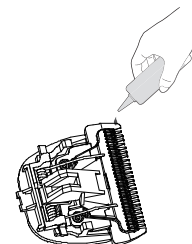

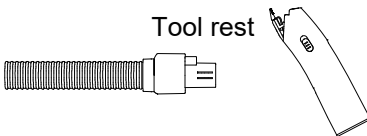

2. Remove debris from the suction port.

Tool head

Tool rest

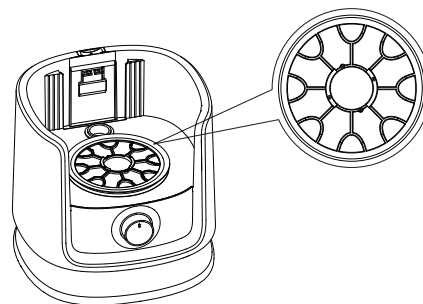

Daily maintenance

Change the HEPA Filter Every 6 Months

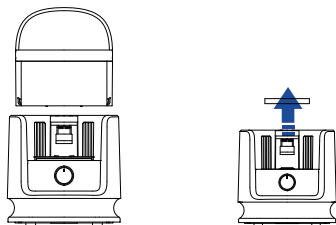

Remove the dust container, and take out the HEPA from the vacuum body.

Note: Continue to use the original filter and do not remove it.

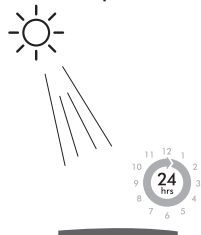

Clean the Sponge Filter

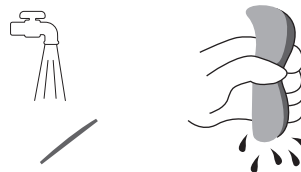

Remove the dust container and detach the sponge from the container

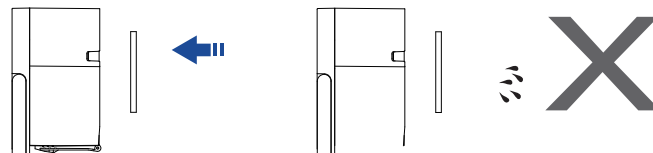

Place it in a well-ventilated place for at least 24 hours of drying

Wash the sponge with running water and drain it after washing

Install the sponge back into the container after it is dried. Ensure it has been installed.
